

Attachment 2– Additional information on how to help Ukraine

1) Financial Contributions to Ukraine Energy Support Fund

In agreement with the European Commission the Ministry of Energy of Ukraine, the [Ukraine Energy Support Fund](#) was established to counteract the impact of the Russian attacks targeting critical energy infrastructure. The Fund enables governments, international financial institutions and international organizations, as well as corporate donors to provide financial support to the Ukrainian energy sector's efforts to repair that damage and keep functioning. Below is a high-level overview on how to contribute to the fund:

1. Contact the Ukraine Energy Support Fund at ukrainesupportfund@energy-community.org and indicate the amount you wish to donate. The Ukraine Energy Support Fund can provide agreement templates to interested donors. Note that for smaller donations (<\$10,000), an agreement may not be needed.
2. Option to convey how the funding should be utilized. For example, should you wish to have your funds earmarked for immediate reconstruction needs, or to go to a specific stakeholder, or specific energy sub-sector, you can request to have the agreement tailored. Note that for smaller donations, funds will be put towards immediate repairs.
3. Negotiate and sign the final agreement.
